

Outsourced IT with TechBoxx

The Proposition

Outsourced IT

Get access to high quality IT resources that can augment existing efforts, at a fraction of your cost. Increase your ability to service the subcontinent by having a local, tightly run resource pool out of India.

We provide professional guidance and recommendations in technology selection based on your ultimate business objectives, resource availability and cost consideration. Furthermore, we can help you stay on top of rapid changes in technology, that can potentially throw a startup off-kilter. Streamline the costs of your IT application portfolio by leveraging open source technologies.

Our team of software professionals can become your backend IT team. We can quickly scale up as and when necessary, to enable a minimal fixed load on your resources.

We can help you with:

- 1) Development Support
- 2) Project Mentoring
- 3) Risk Assessment
- 4) Selection of the right technology
- 5) Code Customisations
- 6) Scaling Up IT Team

IT Cost Structure

Platform	Cost Structure (USD per Man Hour)
iOS	35 – 70
Android	25 – 65
Cloud Computing Architecture	55 – 60
PHP	15 – 20
Java Technologies	25 – 45
Ruby on Rails	30 – 50
